Telephone number: +34 630871203

Address: Madrid, Spain

I've always been passionate about technology. That's the reason I decided to study Telecommunications Engineering, specialising in the field of software field in the final year of my degree.

I've been working as a FullStack Web Developer for 5 years, in International IT Companies. I am very interested in participating in groups that work as a team, where everyone can develop and improve their skills.

WORK EXPERIENCE

MAYO 2022 – MARZO 2024

SOFTWARE DEVELOPER (ENGINEER), SPOTFIRE (TIBCO), SOFTWARE CLOUD GROUP

Here I worked as a developer in the Spotfire product, in the visualization team. Spotfire is a very powerful self-service analytics and data visualization tool, made in a desktop application and in the web. Working with technologies like **React**, to develop the web app, and **.Net** to develop the desktop application and the server side.

I was working in a very solid and experienced team (a software product of more than 20 years, and all that entails), with technologies that I had not used before and an environment completely in English. It became for me an unparalleled and very enriching professional experience.

In addition to improving my technological skills, I was able to experience a work methodology that I was not used to.

MARCH 2021 – AUGUST 2021

SOFTWARE WEB DEVELOPER (SENIOR ENGINEER), EVERIS (NTT DATA)

I got promoted, getting more responsibilities. I was in charge of the newest junior developers, as well as continuing in my role as web developer. I gained experience training new junior developers in basic JavaScript, creating material and delivering lessons.

Apart from continuing with my role as a developer, I was responsible for more control with the continuous integration, managing the following tools: **Github, GitLab, Jenkins, Openshift**.

MARCH 2019 - FEBRUARY 2021

SOFTWARE WEB DEVELOPER (JUNIOR ENGINEER), EVERIS (NTT DATA)

Consultant in a big international bank, making an internal web page application. This was my first time working within the **Scrum Agile Methology** which allowed me to get first-hand experience of this vitally important web development approach. Most important technologies used. Here I had the opportunity to work with a number of different technologies for both the backend and the frontend:

- Frontend: Developing SPA with **Angular +5, StencilJS, Polymer/Litelement** was used to develop different web components that were integrated in the SPA. (**HTML, CSS, JS, TS**).

- Backend: **NodeJS** - working with **NestJS** frameworks, and **ExpressJS** library, for the different microservices were developed in the backend.
- DDBB: **TypeORM** to easy link the **TypeScript** application to the database. **PostgreSQL**.
- Agile Methodologies: **Jira** was the tool used to manage the project to follow the **Scrum** philosophy.

SEPTEMBER 2018 – DECEMBER 2018

WEB DEVELOPMENT INTERNSHIP, POLYTECHNIC UNIVERSITY OF MADRID

Intern in the [LifeSTech](#) group. Working with **Angular 6** framework, and together with developers from a number of European countries, we delivered a web application which assisted the elderly in improving their lifestyle.

This was my first time coming into contact with web development field and I was instantly interested in the field. It was my first time working with a group of developers and I knew I wanted to continue working in this kind of environment

STUDIES

2012 - 2018

DEGREE IN TELECOMUNICATION TECHNOLOGIES AND SERVICES ENGINEERING, POLYTECHNIC UNIVERSITY OF MADRID

- Speciality: Telematics
- Final Degree Project: “**Development and Evaluation of a Sarcasm Detection Algorithm based on Machine Learning and Natural Language Processing Techniques**”

2021 - PRESENT

DIPLOMA IN FULL STACK SOFTWARE DEVELOPMENT, CODEINSTITUTE

- **Technologies**: HTML, CSS, JavaScript, React, Python.

OTHER INTERESTS

- Other language and Technologies that I’ve worked with at university: Python, Swift (iOS), Java. React and React-Native
- Voluntary work: At Ghana (August 2017). Organization: “Hola Ghana”. Construction of a school and support classes for children between 7 and 12 years old.
- Voluntary work: At Madrid (from September 2017 2019). Organization: “Asociación Bokatas”. I dealt with homeless people.
